

Indorama Ventures' Hazardous Chemicals Commitment

Indorama Ventures is a world-class sustainable chemical company with a global leadership position in specialty chemicals, PET and fibers, serving major customers across diverse end-use markets. As a leading global producer in the petrochemicals sector, we recognize our responsibility to prioritize the health and safety of our consumers, employees, and the environment. To reinforce our commitment to sustainability and public health, we are proactively addressing the commitment of hazardous chemicals within our product portfolio.

Our Commitment:

- **Commitment to Sustainable Chemistry:** we are dedicated to advancing sustainable chemistry and material science to benefit business, society, and the planet. This commitment aligns with our efforts to promote transparency, product safety, and sustainability throughout its operations. The company has adopted practices to ensure the development and use of safer and more sustainable materials, as outlined in its product stewardship initiatives.
- **Sustainable Products:** we define Product Stewardship Management as a means to minimize the impact of our products on the environment and on customer health and safety. We strive to substitute chemicals with safer alternatives that are either readily available or can be developed, resulting in a progressive phase-out of these substances across our products.
- **Proactive Reduction of Hazardous Chemicals:** we are committed to reducing the environmental impact and toxicity of our products.
- **Sustainability and Safety Goals:** we continue to meet our goals of
 - Achieving 100% compliance with REACH regulation for all European entities.
 - Ensuring 100% compliance with the ECHA SVHC list.

Indorama Ventures is committed to leading the way in sustainable chemistry and ensuring the safety and well-being of our customers, employees, and the environment. Through our proactive phase-out of hazardous chemicals, we aim to set a benchmark for the industry and contribute to a safer, more sustainable future.
